DAT DIMENSIONAL LUMBER

Dried After Treatment Lumber improves upon standard pressure treated lumber by permanently fixing the preservative within the wood. With its improved stability and workability, and attractive appearance, it is the ideal wood for every project.

- **Reduced Cupping, Twisting and Warping.**
 - Boards are pre-shrunk in a controlled environment.
- **Mill, Paint & Stain Immediately**
 - Improved workability and decreases project timeframes
- **Improved Fastener & Nail Holding**
 - Drying process improves density
- **Clean and Dry - No more wet lumber**
- **Lighter & Easier to Handle**
 - Moisture eliminate decreases wood weight
- **Environmentally Stable**
 - Treatment liquid is set in the wood and won't leak into the environment.

Specifications

Species: SPF

Grades: #1 Premium or Clear

Treatment: CAC UB4A Ground Contact

Drying: Low temp kiln or warm air

Moisture Content: 19% average

Packaging: 1/2 size unit, paper wrapped

DIMENSION	LENGTHS	1/2 UNIT QTY
